# LUMO

# MINI

## LUMO MINI

The iconic Lumo Mini expands its versatility with a new white finish. This new option allows for a more subtle integration into light and minimalist spaces. It retains its compact design and distinctive character.

# DISC MINI DEEP

## DISC MINI DEEP

The evolution of one of our most recognized commercial products. This new version combines a more decorative aesthetic with optimized performance for greater efficiency. It incorporates tunable color temperature control to adapt to different environments and features IP54 protection for enhanced durability in demanding conditions.

# ERYL

20

21

## ERYL

A luminaire that expands the possibilities of control and customization in lighting projects. Now available with DALI protocol, enabling more precise lighting management. It incorporates new PN installation options and a new 2700K color temperature.

# LUXO

22

23

## LUXO

The Luxo family expands with new solutions adapted to different projects. It incorporates compact models that facilitate seamless integration into architecture. All of this is complemented by technical improvements and new installation options.

PRODUCT NEWS & INNOVATIONS KOHL LIGHTING

# NOON

24

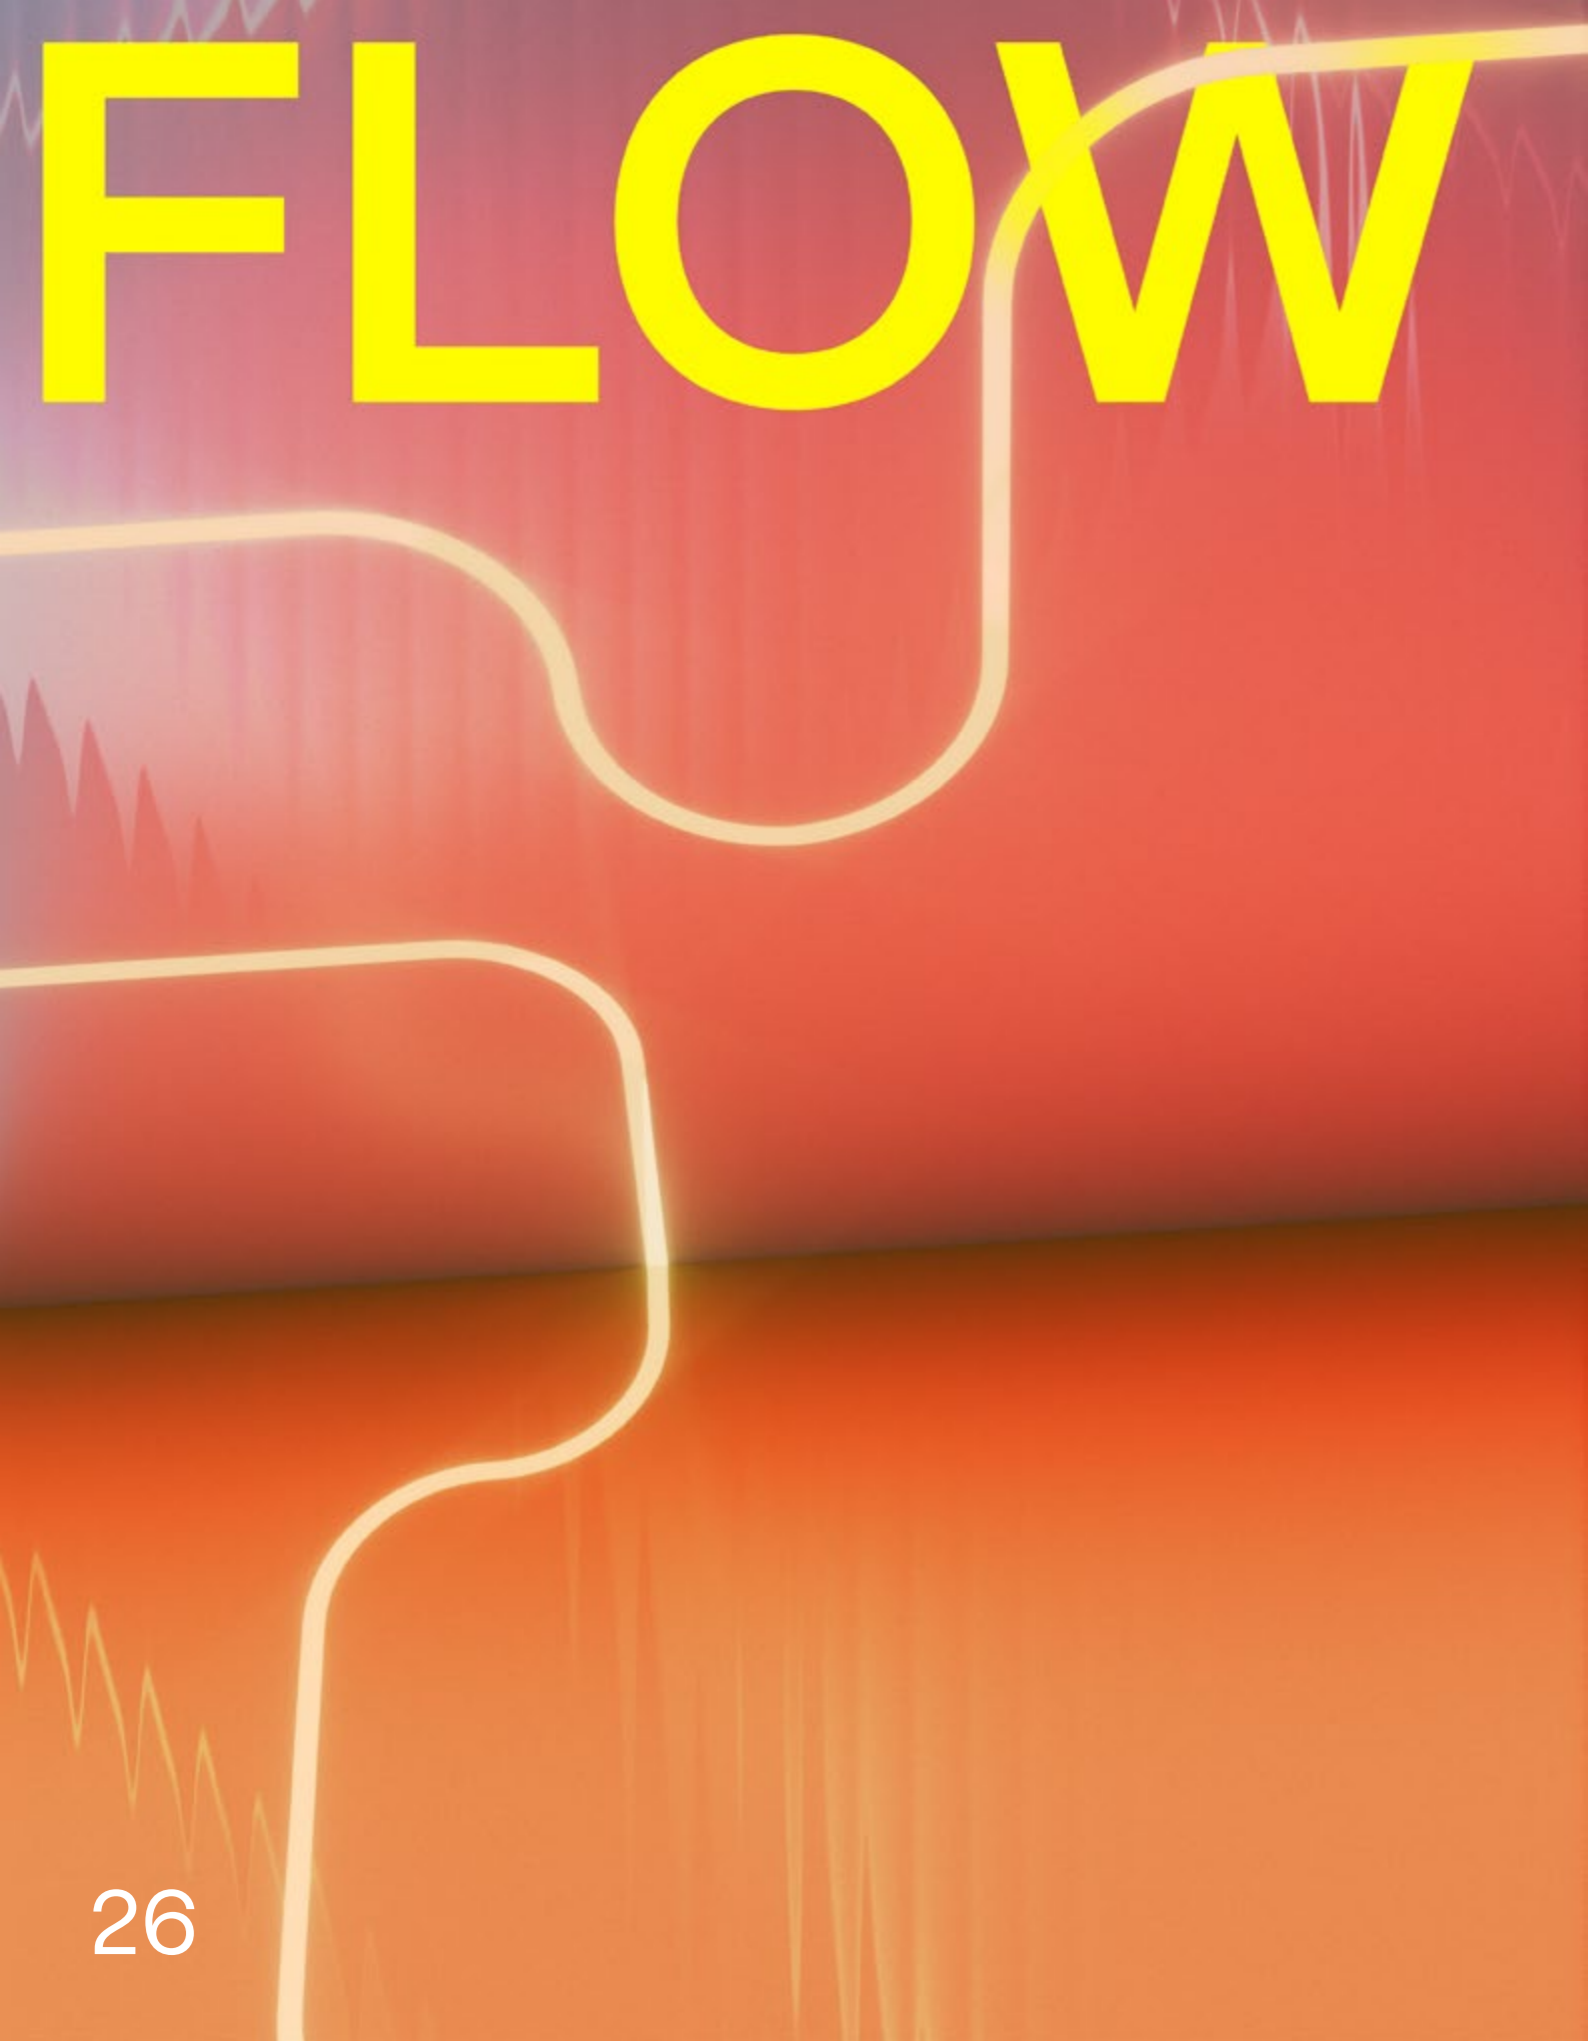

25

## NOON

An evolution that expands possibilities with enhanced performance. It introduces TR installation, more compact models and optimized efficiency. It also features CRI90, a 24° beam angle and new installation options that enhance its versatility.

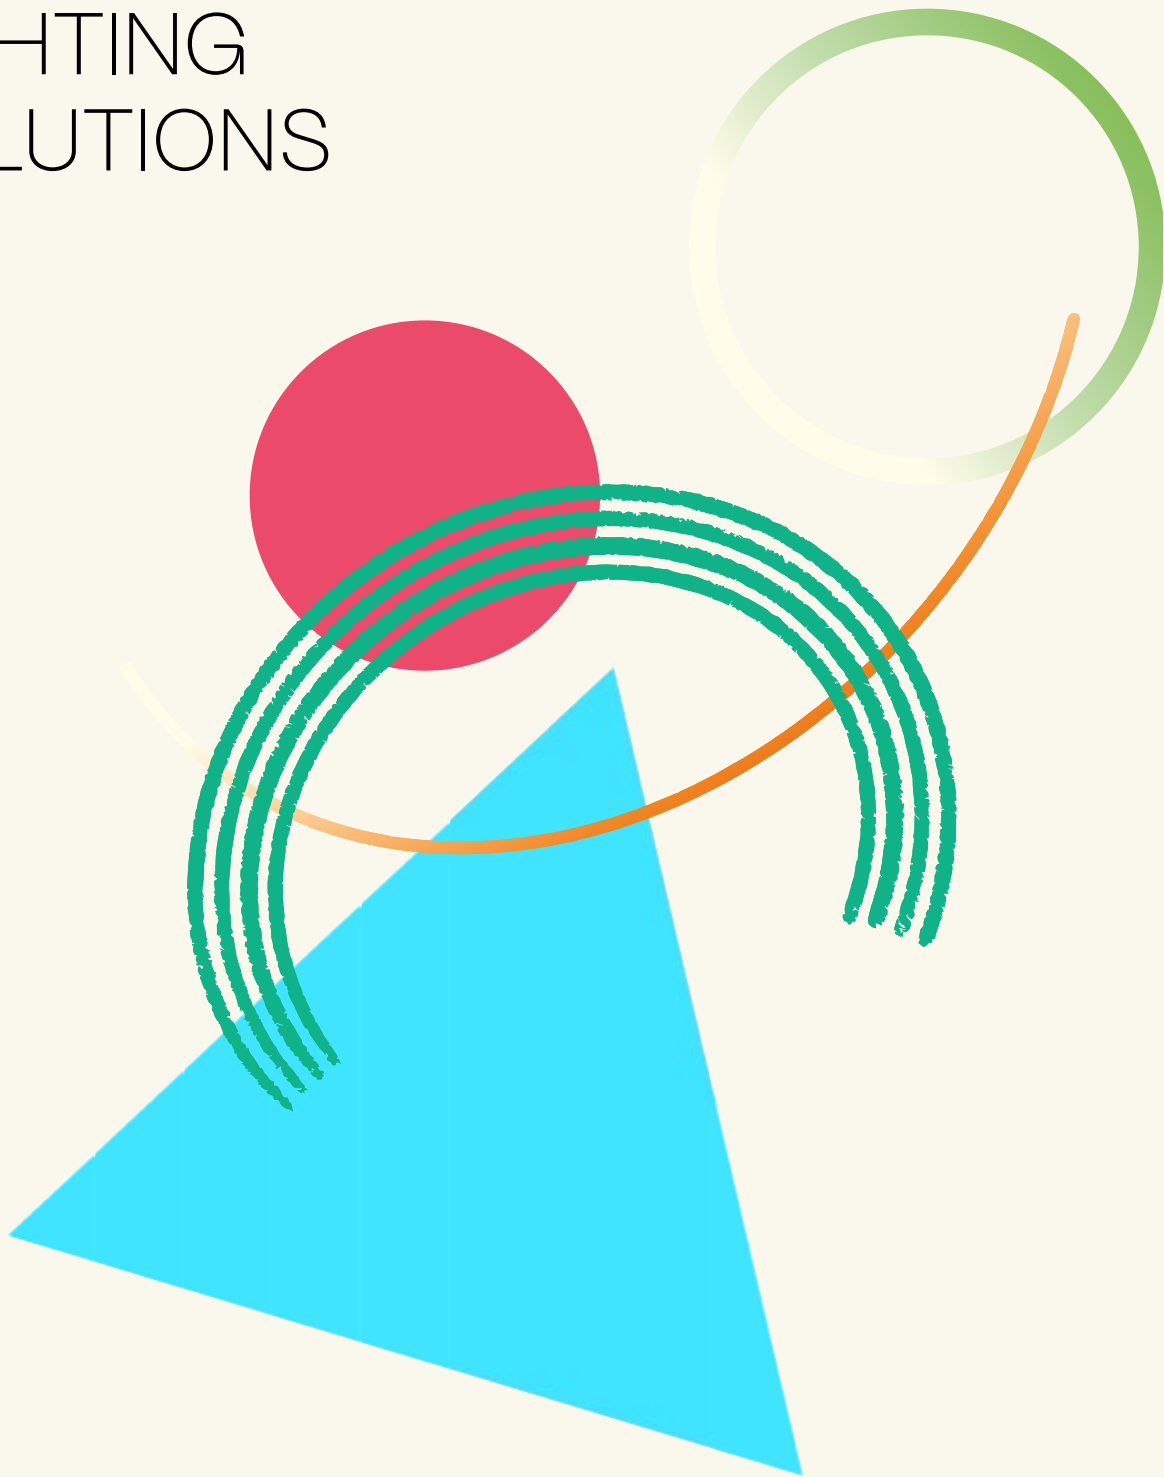

PRODUCT NEWS & INNOVATIONS KOHL LIGHTING

### FLOW

The Flow family evolves with new LED strips designed to meet current lighting needs. It incorporates new profiles that allow these solutions to be seamlessly integrated. In addition, silicone LED strips and a new cylindrical silicone family are introduced, designed to create striking lighting compositions.
